HALO For AI Builders & Business Teams by OmniTrust

Build AI Agents. Put Them to Work, Securely.

Connect Your Apps. Automate Real Work. Scale with Confidence.

Move beyond experimenting with AI. Halo Agent Studio empowers business teams and AI builders to create, deploy and operate intelligent agents that connect to real enterprise applications, data and workflows. From personal assistants to business automation, Halo combines the freedom to innovate with built-in identity, security, governance and cost control.

Turn AI potential into real business productivity. Build agents that do more than answer questions. Give them approved access to business systems, let them perform useful tasks and automation workforce productivity.

BUILD

Mobilize AI Agents in Moments

Create and customize AI agents with intuitive tools. Define their purpose, instructions, knowledge, capabilities and preferred models without starting from scratch.

CONNECT

Connect Apps, Data & Tools Securely

Bring agents into your real business workflows using enterprise application integrations, APIs and MCP. Give every agent access to the information and tools it needs, with permissions that you control.

OPERATE & SCALE

Put Trusted AI to Work

Run agents in secure environments with identity, runtime policies, spending limits, approvals and auditability built in. Share and expand AI-powered workflows across your teams with confidence.

HALO One Agent Studio. Unlimited Business Possibilities.

- Vendor Managed Inventory
- Spend Management
- Customer Success
- Competitive Intelligence
- Business Reporting

& Many More Uses

© OmniTrust Security LLC

Capability	Features & Outcomes
Agent Builder	Create, configure and deploy agents through an intuitive interface. Define jobs, instructions, knowledge, tools and actions.
App & Tool Connections	Connect business applications, enterprise data, APIs and MCP-enabled tools with scoped access.
Flexible AI Models	Select approved AI models and providers, including Halo-managed and bring-your-own-key options.
Secure Agent Runtime	Execute agents in isolated environments with network restrictions, gateway-mediated actions and credential protection.
Identity & Permissions	Give each agent its own identity, authorized capabilities and controlled access to enterprise resources.
Governance & Human Oversight	Apply policies, require approvals, monitor activity and quarantine agents when necessary.
Cost & Usage Control	Manage agent budgets, understand model consumption and control spending through Halo's AI Gateway.

HALO Halo Agent Studio Differentiators

Build Faster. Deliver Value Sooner

Move from an idea to a working agent through a streamlined creation and deployment experience.

Choose Your AI. Control Your Costs.

Select the models, providers and infrastructure that best suit your requirements while maintaining visibility over consumption.

Connect AI to Your Business

Go beyond standalone chatbots. Give agents governed access to the apps and info needed to perform work.

Security Built In, Not Bolted On.

Every agent operates within Halo's governance framework, with identity, permissions, runtime protection, evidence and operator control.

Built on Decades of Trust. Engineered for the AI Workforce. Halo Agent Studio is powered by OmniTrust's AI Lifecycle Management platform and supported by our broader Trust Lifecycle Management expertise. Together with OmniTrust's ILM/PKI Agentic Identity Fabric, our approach brings cryptographic trust, agent identity and enterprise security principles to the autonomous AI era.
